PROFILE

GATE CSE 2026 qualified with score 506 | Computer Engineering student at PCCOE Pune

EDUCATION

Pimpri Chinchwad College of Engineering

Bachelor of Technology – Computer Science Engineering | 2023 – 2027

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript

Web Development: HTML, CSS, React JS, Node JS, Express JS, JWT Auth

DS & ML : Pandas, Sci-kit Learn, Pytorch, PowerBI

Databases : MySQL, MongoDB

Gen AI : , Langchain, RAG, Hugging Face, Ollama

DevOps & Cloud : Git, GitHub, AWS, Docker, Postman

PROJECTS

AI Code Debugger Agent | *Python, LangChain, RAG, ChromaDB, PyTorch, Groq API (LLaMA 3.1)*

- Built an agentic code debugging system using LangChain with Groq-powered LLM inference
- Implemented RAG pipeline (ChromaDB + Sentence Transformers) for context-aware debugging
- Developed PyTorch classifier to categorize errors (syntax, runtime, logic) for targeted prompts

FitTrack - A full stack fitness application | *MongoDB, React, Node JS, Express JS, JWT*

- Developed MERN fitness platform with activity tracking and automated workout split generation
- Implemented JWT auth with bcrypt and integrated nutrition logging system
- Built dashboards (Chart.js) for calories, macros, and workout progress
- Deployed via Vercel (frontend) and Render (backend) with MongoDB Atlas

Nexus Social Media Platform | *VPC, Load Balancing, Auto Scaling, Dual-DB Architecture, AWS EC2, RDS, S3*

- Built scalable social platform using 3-tier AWS architecture
- Configured ALB + Auto Scaling EC2 for traffic distribution and scalability
- Used RDS (MySQL) for relational data(users, posts, follows), MongoDB for semi-structured chats and S3 for media storage
- Designed secure VPC with public/private subnets and configurations.

Mental Health Chatbot (SafeSpace) | *Node.js, FastAPI, LangChain, ChromaDB, MongoDB, JWT, HuggingFace, Docker*

- Developed RAG-based mental health chatbot using LangChain + ChromaDB
- Integrated LLaMA 3.3 (Groq) for empathetic response generation
- Built Node.js backend with JWT auth and FastAPI microservice for AI agent.
- Containerized with Docker and deployed on Hugging Face

ACHIEVEMENTS

- GATE 2026 – Computer Science (CS):** Qualified with a score of 506, demonstrating strong command over core computer science fundamentals.
- GATE 2026 – Data Science & Artificial Intelligence (DA):** Qualified with a score of 474, demonstrating proficiency across core domains including Machine Learning, Probability & Statistics, Data Structures, Python Programming, Data Warehousing, and Artificial Intelligence.

CERTIFICATIONS

- NPTEL – Database Management System** (Score: 62%) — Covered relational models, SQL, normalization, and transaction management.
- NPTEL – Theory of Computation** (Score: 70%) — Topics included automata theory, formal languages, Turing machines, and computational complexity.

- **Udemy – Machine Learning and Data Science with Python** — Hands-on training in supervised/unsupervised learning, model evaluation, and real-world data science workflows.
- **Udemy – Ultimate AWS Certified Cloud Practitioner (CLF-C02)** — Comprehensive coverage of AWS core services, cloud architecture, security, billing, and cloud best practices.
- **Udemy – The Complete Full-Stack Web Development Bootcamp** — Covered frontend technologies like HTML, CSS, JavaScript and React, along with hands on backend development using Node JS, Express and SQL
